

STIGMA-ROTARY

THE STIGMA®- ROTARY TATTOO MACHINES WERE DEVELOPED/DESIGNED BY EXPERIENCED TATTOO ARTIST ARTEMIS ROSAKIS WHICH DID NOT FOUND THE PERFECT MACHINE TO WORK WITH AND DECIDED TO BUILD SUCH. THE CREATION IS COMBINING THE BENEFITS OF A COIL MACHINE (SOFTNESS/ADJUSTMENTS) WITH THE USE OF A ROTARY MACHINE (LESS VIBRATIONS/LESS NOISE/NO TUNING). THE TECHNOLOGY BEHIND STIGMA® MACHINES SAVES YOU A LOT OF PRE-TATTOOING TIME (ADJUSTMENTS & TUNING TIME) IT ALSO HELPS YOU TO COMPLETE YOUR WORK FASTER AND EASIER. IT IS NOT JUST EASIER & FASTER WORKING - IT IS ALSO BETTER FOR YOUR HEALTH (LESS VIBRATION, LESS WEIGHT AND LESS NOISE).

STIGMA® "BIZARRE" TATTOO MACHINE

ADVANCED ROTARY TATTOO MACHINE. LIGHT WEIGHT AND PERFECT BALANCED.

THE HARDNESS/SOFTNESS OF THE "STROKE/PUNCH" IS ADJUSTABLE. BY SIMPLY TURNING THE CONTROL-THUMBSCREW YOU CAN TURN THE "BIZARRE" MACHINE FROM HARD HITTING (LINER) TO SOFT HITTING (SHADER). THIS ADJUSTMENT IS FOUND ONLY ON THE STIGMA®- ROTARIES AND IS SOLVING THE OLD PROBLEMS OF USING ROTARIES WITHOUT ANY CONTROL ON THE HARDNESS /SOFTNESS.

THE MACHINE PARTS ARE PRODUCED TO PRECISION IN GERMANY. THE FRAME IS CNC MACHINED FROM A SOLID BLOCK OF AIRCRAFT ALUMINIUM AND THEN DEEP ANODIZED. ROBUST FRAME AND HI-TECH CONSTRUCTION.

THE WEIGHT OF THE "BIZARRE" MACHINE IS 107gr/3,8oz. THE "BIZARRE" MACHINE CAN BE USED WITH RCA OR STANDARD CLIPCORDER. SWISS MADE POWERFULL (4.5watt) MOTOR.

USE OF STANDARD NEEDLES AND STANDARD BACK TUBE. CAN BE USED WITH ALMOST EVERY POWER-SUPPLY.

THE WORKING VOLTAGE RANGE IS 7-13volt DC (**NEVER TO BE USE WITH MORE THEN 13volt!!!**). THE BIZARRE MACHINE HAS POLARITY PROTECTION (TURN CLIPCORDER IF MACHINE IS CONNECTED BUT NOT WORKING).

WHEN THE MACHINE IS STOPS WORKING THE NEEDLES ARE ALWAYS PUSHED UP (OUT OF THE SKIN/INTO THE TIP).

PATENT-PENDING MACHINE AND COPYRIGHT PROTECTED DESIGN. WE WILL FIGHT EVERY COPY/IMITATION (NOT JUST PRODUCERS BUT ALSO RE-SELLERS)!!!

VERY IMPORTANT

USE ONLY SYNTHETIC GREASE
OR YOU WILL DAMAGE
THE MACHINE

LUBRICATE WITH A SMALL AMOUNT
OF SYNTHETIC GREASE
AT THE SPOTS SHOWN WITH
THE ARROWS EVERY ABOUT
100 OPERATING HOURS

TURN THE CONTROL - THUMBSCREW
TO CONTROL SENSITIVITY (GIVE)
THEN RUN THE MACHINE AND TOUCH THE
NEEDLE BAR TO TEST THE SENSITIVITY

TURN THE CONTROL SCREW
WITH YOUR FINGERS OR
WITH AN HEX (ALLEN) KEY

TIGHT FOR LINING
LOOSE FOR SHADING

RUN BETWEEN 7 ~ 13 VOLTS
BEST IS 8 ~ 11 VOLTS
MAXIMUM 13 VOLTS

The "Bizarre" has now polarity protection
on the wires, the machine will run only if
the polarity on the wires is correct.

The positive pole (+) on the clipcord
connection is the UPPER one.

The positive pole (+) on the RCA
is in the CENTER.

If your machine does not run by the clipcord,
just turn your clipcord upside down.

If your machine does not run by the RCA
then switch the wires on your power supply.
